SERVICES AND TRAINING

Welcome to **SMART COMPUTER RENTALS'** Texas corporate office

SMART COMPUTER RENTALS employs the highest caliber Microsoft certified service technicians. Our in-house repair and service capability usually completes your work within 72 hours. If we take longer we'll provide you temporary equipment at no charge. Need the work done on-site? Our professional technicians will arrive promptly on your schedule with the tools necessary to complete the job in a timely manner. If your job requires more than one technician, a consultant will meet with you prior to any work so you will know in advance what, how and when the work will be performed.

We also provide after-hour service to accommodate your conversions and upgrades, when downtime is too costly or inconvenient for your business. Once the work is completed, Smart technicians will walk you through all the changes to ensure a smooth operational transition.

Smart can bill your organization by the hour or provide an extended service plan to fit your needs and budget. Additionally, we can pick-up your computer equipment and repair it in-house so that your systems are repaired in the shortest possible time.

Free estimates are always provided before any work is completed. We strive for total satisfaction.
